ACTION INITIATED BY: CITIZEN'S COMPLAINT

- 1- 10-12-72 09:45 - Area was inspected by H. Criswell and R. Lyman (San San). There appeared to be molasses, oil, food etc pooling on ground where trucks had apparently been washed and a pile of lard, probably of the same origin. There was a truck on the premises at the time of inspection. It belonged to Erickson's Transport. There was a small stream where it appeared that some of the liquid ran down a driveway to the street, but there was not sufficient flow to sample. Pictures were taken and City Health Officials notified.
- 2- 10-12-72 11:30 - Notice of Violation and Cleanup order given to Don Moore at premises, B. Wilson (Health)
- 3- 10-27-72 11:00 - Discovered floor grates in cleaning garage tributary to storm sewer.
1:00 - Met with Don Moore - Restricted from washing inside. He explained building was leased and ownership had changed hands. Lease was up in about 60 days.
- 4- 10-30-72 08:30 - Met again with Don Moore - gave permission for limited use of M.H. J-13, #64 on temporary basis - New owner of buildings LeGrand Vreeken (California)
- 5- 4-2-73 9:00am - meeting of new facility (old Campa into Mallen) at 1505 E. Chestnut - by R. Corson, R. Lyman, B. Pabst - diagram inclosed
- 6- 3-29-73 dye-tracing of new location - Map Inclosed Corson, Lyman, Pabst
- 7- 4-24-73 Short meeting was held to discuss T.M.I.C. Liability - when doing outside washing. Also we received a copy of their ingredients of detergent used & of their degreaser. Criswell & Pabst
- 8- 7-24-74 Letter to Mr. Moore requesting that the flow going across their parking lot be diverted into the San. Sewer. Also Requested that they give this office, within seven (7) days, when work would be completed
- 9- 8-5-74 - Letter From Don Moore stating that work has been completed or should be in compliance with the Law.

INTER-OFFICE MEMORANDUM

ATTENTION OF Memo to File

DATE February 28, 1980

DEPARTMENT _____

Randy Lyman and Steve Short inspected Hawthorne Industrial Services, 1505 East Chestnut Expressway. Overspray from truck washing was leaving the property to the South. Also, observed was a discharge to the North from a degreasing operation. The shop manager informed this office he would not degrease outside and clean trench drains. This should keep the problem to a minimum.

Dear Mr. Moore:

On several occasions prior to this letter you have been advised that the discharge of pollutants into the storm sewer system is a violation of City, State and Federal Law.

Most recently, City surveillance and enforcement personnel observed a large quantity of wash water from your mobile operation entering the storm sewers at Hiland Dairy and again flooding the street in the area of Banta Fruit Company.

We would like to meet with you to discuss these problems again, and would propose Wednesday, November 20, 1974, at 9:00 A.M., in your office. If another time would be more convenient, please contact us. If we may be of further assistance or can answer any questions, please feel free to call on us.

Yours truly,

Eugene D. Pabst
Water Pollution Control Inspector

November 14, 1974

Mr. Don Moore
T.M.I.C. Industrial Cleaning
1505 East Chestnut Expressway
Springfield, Missouri

Dear Mr. Moore:

It has come to the attention of this office that you are still doing truck washing at various places around the city. Also, the runoff from washing these trucks is entering the storm sewer. The most recent occasion being November 12, 1974 at the Banta Fruit Co. Surveillance and enforcement crews observed Banta's trucks being washed, by your personnel and the entire flow from the truck washing was entering the storm sewer.

As you have already been informed, a discharge of this type is against City, State and Federal Law. By allowing this type of discharge to continue you are accepting complete liability for violating the law. The penalty for such violation, according to Senate Bill 321 Section 204.076, is as follows:

"Any person who willfully or negligently commits any violation...shall be punished by a fine of not less than twenty-five hundred dollars nor more than twenty-five thousand dollars per day of violation, or by imprisonment for not more than one year, or both. Second and successive convictions for violation of the same provision here under by any person shall be punished by a fine of not more than fifty thousand dollars per day of violation, or by imprisonment for not more than two years or both." As you can tell this is a very serious matter and should not be taken lightly.

We are not trying to put you out of business, nor are we telling you to eliminate your industrial cleaning operation outside of your building on E. Chestnut. We are trying to get you in compliance with the Law. We have stated once before that we would help you find suitable locations where you can wash into the sanitary sewer, and we are still willing to do this.

We would like you to inform this office, in writing, within seven (7) days, as to when we can meet with you to discuss this problem.

If we can be of further assistance or can answer any questions, please feel free to call.

Yours truly,

Gene Pabst

Dear Mr. Pabst:

This letter is in answer to your letter of July 24, 1974 regarding the flow of water from our washing operation drains to the parking lot at the south of our building and then into the storm sewer.

Please be advised that we have now cut drains which will divert this flow of water into the sanitary sewer which will no longer be a violation of the law.

This work was completed August 1, 1974 in compliance with your request.

Yours truly,

Don D. Moore
President

1505 East Chestnut Expressway
Springfield, Missouri

Dear Mr. Moore:

On several occasions, surveillance and enforcement crews have noticed that part of the flow from your washing operation drains to the parking lot at the south of your building. The flow eventually drains across your lot to a drainage ditch adjacent to Chestnut Expressway. Please be advised that this discharge, into the storm sewer, is in violation of City, State, and Federal Laws. Steps should be taken, immediately, to divert this flow into the sanitary sewer. Please inform this office, in writing, within seven (7) days, when you expect to have this work completed.

If we may be of further assistance or can answer any questions, please do not hesitate to call.

Yours truly,

Eugene D. Pabst

T.M.I.C. Industrial Cleaning

4-24-73 9:00
Criswell and Pabst

A short meeting was held to discuss the liability of T.M.I.C. when doing industrial cleaning outside their building. Harry pointed out, to Mr. Don Moore, that they would be liable (or the property owner) for anything that left the property on which they were cleaning. Also, Harry pointed out that at Hiland and Foremost Dairy, there is a Sanitary Sewer available for them to wash into. Harry offered our services, if at anytime, they had any questions concerning areas of outside washing, and the availability of Sanitary Sewer at those points.

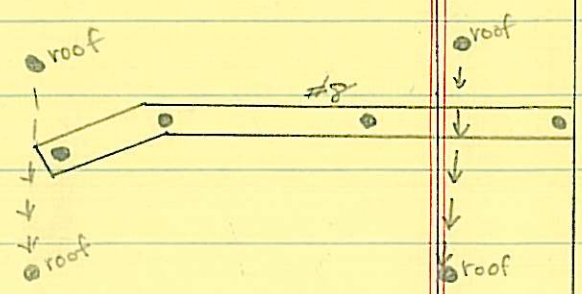

Mr. Moore gave us a copy of the ingredients of their detergent used in industrial cleaning. Also, their degreaser consists of a 1:1 ratio of #2 diesel and emulsifier and Stodard Solvent. The largest quantity of degrease used, at one time, is roughly 3 gallons. (1½ gallons of #2 diesel and 1½ gallons of Stodard Solvent) They also use an emulsifier.

November 3, 1972

Mr. Don Moore
T.M.I.C. Industrial Cleaning
1643 East Florida
Springfield, Missouri 65803

Dear Don:

This letter will confirm our conversations on October 27 and October 30. You will recall that during a routine inspection on the 27th, we discovered that the drainage from your cleaning building is tributary to the storm sewer. I understand that the majority of the activity at that location is the cleaning of tank trucks owned by Erickson Transport Corporation which haul a variety of materials. We suspended operation of cleaning at that time, and told you that we would try to help in locating an access point to the sanitary sewer.

On Monday, October 30, we again contacted you and discussed the possibility that you could wash directly into a manhole on a temporary basis. The manhole is located on a lot east of your building. (For the convenience of our records, the location is M.H. J-13, #64.) This is to confirm that T.M.I.C. Industrial Cleaning does presently have permission to temporarily wash cleaning effluent directly into that manhole.

I understand that you lease the building where you are presently located. Formerly this building was owned by Hutchens & Son Metal Products, Inc., but was recently purchased by LeGrand Wreeken of California. You should explain the problem as it stands, that to discharge your waste into the storm sewer is a violation of City, State, and Federal Laws, and determine either his willingness or unwillingness to make the necessary corrections. We are more than willing to meet with you at any time.

If we may be of further assistance or can answer any questions, please do not hesitate to call.

Yours very truly,

Charles H. Criswell
Chemist and Aquatic Biologist
